

TS-1  
Music Streamer

The new fully balanced, high-bias discrete headphone amplifier has an output impedance of just 1 ohm. Ensuring extended high frequencies while refining the tuning for a smoother sound, providing a more enduring and enjoyable listening experience

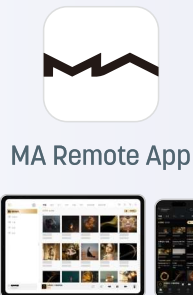

Product Details

# TS-1

## Music Streamer

The TS-1 is a new-generation all-in-one solution by 「Matrix Audio」 for headphone and active monitor audiophiles. Adhering to the core philosophy of "simplifying complexity", the TS-1 seamlessly integrates a streamer, DAC and headphone amplifier into one compact device. Pair it with your favorite headphones or active speakers, and you'll have a high-quality Hi-Fi system ready to go. The TS-1 offers a one-stop solution that strips away the unnecessary and brings music back to its pure essence.

/ The independently developed MA Player Hi-Fi Streamer OS and MA Remote App

- 2 x AK4493SEQ Hi-Res DAC
- Fully balanced circuit
- Ultra-low impedance amp
- Subwoofer output
- HDMI ARC
- Analog input
- 2 x femtosecond clock
- NVMe slot
- 2 x USB 3.0
- CD Playback
- CD Ripping
- Wi-Fi 6
- Gigabit Ethernet
- Support linear power
